Package Performance (Long)

This ETFs Forecast Package had correctly predicted 10 out of 10 stock movements. FAS was the highest-earning trade with a return of 103.9% in 1 Year. TQQQ and IXC saw outstanding returns of 55.73% and 39.06%. The package's overall average return was 35.46%, providing investors with a 13.07% premium over the S&P 500's return of 22.39% during the same period.

Algorithmic traders utilize these daily forecasts by the I Know First market prediction system as a tool to enhance portfolio performance, verify their own analysis and act on market opportunities faster. This forecast was sent to current I Know First subscribers.

How to interpret this diagram

Algorithmic Stock Forecast: The table on the left is a stock forecast produced by I Know First's algorithm. Each day, subscribers receive forecasts for six different time horizons. Note that the top 10 stocks in the 1-month forecast may be different than those in the 1-year forecast. In the included table, only the relevant stocks have been included. The boxes are arranged according to their respective signal and predictability values (see

below for detailed definitions). A green box represents a positive forecast, suggesting a long position, while a red represents a negative forecast, suggesting a short position.

Please note-for trading decisions use the most recent forecast.
